

For my mouse, the ergonomics of my mouse are quite nice, it feels very natural on my hand. The thumb indentation works perfectly, and my pointer and middle finger have a great resting place. The back of my hand is not sliding off and fits comfortably around the back of the mouse. The functionality of the mouse is not all that great. I played Minecraft for about 30 minutes with it, moving the mouse around a jumpy on screen and I had to press down quite hard to get the mouse to click. Overall, it fits great in my hand but struggles a tad functionally.
