

Things to change on MK 1 for MK 2:

- Make wider by 5 millimeters
- Take center button cut up through the wheel hole
- Make shell thinner, from 1.5 mm to 1 mm
- Center cord hole
- Make the center hump wider and longer
- Take side button cut up a few more millimeters, 5 to 10 mm
- Round out back left corner to mirror back right corner
- Make mouse hole opening 1 to 3 millimeters wider
